

About eHealth Africa

eHealth Africa (eHA) is a health social enterprise focused on improving health systems with core technical expertise in the following focus areas: Health Delivery Systems, Public Health Emergency Management Systems, Disease Surveillance Systems, Laboratory & Diagnostic Systems, Nutrition and Food Security Systems and in sustaining program interventions.

Our Mission: To build stronger health systems through the design and implementation of data driven solutions that respond to local needs and provide underserved communities with tools to lead healthier lives.

Our Vision: Based in Africa, we establish new standards in health delivery and emergency response through the integration of information, technology, and logistics.

Our Expertise

Project Management: We develop long-term health systems that strengthen our projects from start-up through close-out, using innovative, sustainable, data driven solutions.

Informatics: Our team of software developers and geographic information systems technicians deliver cutting-edge engineering to the most difficult of contexts and build ground-up, design-oriented software and maps.

Public Health: We coordinate people, organizations, systems, data and governments to help build better health systems.

Administration: Through administration we direct, evaluate and manage the business operations, in order to achieve greater efficiency and yield productive results. This includes Finance, Human Resources and Grants & Contracts.

Operations: Operations plays an important role in the planning, coordination and control of all the resources needed to support the organization's internal and external customers. The team manages core logistics and infrastructure initiatives to ensure we deliver results with quality efficiency.

Our Key Achievements

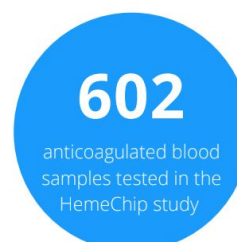

- Reduced RI stock-out rates in Kano, Nigeria from 95% to less than 5% in 1 year through vaccine direct delivery project
- Provided 6 million beneficiaries free medicines through Health Camps in Nigeria
- Vaccinated 9,000 participants with an Ebola candidate-vaccine in Sierra Leone
- Played a key role in the eradication of polio in Nigeria
- Currently manages and supports warehouses for WFP in Kano and Borno states in Nigeria

Our Flagship Projects

Laboratory Innovations

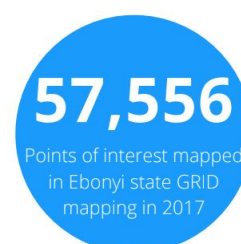

We build and operate effective laboratories in-country, and develop the tools and technologies needed to collect and disseminate information generated from labs in order for stakeholders to appropriately respond to public health events. Our modern lab facility in Kano, Nigeria currently operates research activities in collaboration with University of Nebraska Medical Centre, and International Foundation Against Infectious Disease in Nigeria. Two research-related activities are underway:

- *Induced Sputum Project*: diagnosis of causative agent of pneumonia in pediatrics
- *HemeChip Pilot Study*: Electrophoretic technique for rapid diagnosis of genotype

Geospatial Reference Information Database

The GRID project is a multi-country, multi- donor initiative that aims to collect and store geospatial data in several African countries, including Nigeria. The goal is to generate integrated mapping of development needs throughout identified countries. In Nigeria, eHA aims to improve state resource planning, allocations, and intervention activities to reduce inequality in underserved communities, and to improve emergency preparedness and response to large scale epidemics.

Our Strategy to Deliver Results

- Utilization of data to generate evidence-based insight and inform better execution
- Integration of data, analytics, and information & communication technologies
- Large-scale program implementation including logistics and operations

Staff Capacity

eHA employs approximately 500 people in West Africa, USA, and Europe. We work across the region with a focus on West Africa. We have country offices in Nigeria and Sierra Leone and have resource capacity and strategic partnerships in Cameroon, Chad, Democratic of Congo, Mali, Niger, South Sudan, and Somalia.

Our Partners

- Bill & Melinda Gates Foundation
- CDC Foundation
- Gesellschaft für Internationale Zusammenarbeit (GIZ)
- Nigerian National Primary Health Care Development Agency
- U.S. Centers for Disease Control & Prevention (CDC)
- The U.K. Department for International Development (DFID)
- World Food Programme (WFP)
- World Health Organization (WHO)
